# A GLITTERING PATH

A new tourism coach from the Irisbus range, Domino is sure to meet with universal approval. Its clever design with excellent interior comfort, the priority placed on safety and the careful consideration of the driver's wellbeing, and the optimised performance and reduced operating costs, all point to a bright future for Domino.

## A polished design

The flowing exterior lines, the expressive front face, and the smooth side walls with generous windows affording perfect visibility, combine to make Domino, designed by Pininfarina, a living model of elegance and modernity.

## Comfort class

Passengers on Domino enjoy perfect accessibility, with a wide entry step leading to a generously-sized corridor and evenly-spaced seats throughout. Life on board is made all the better by the ample luggage hold that can be opened automatically from the driver's position.

## A happy driver

With an ergonomic instrument panel and dash board, spacious surroundings, cruise control as standard, a gear change like that of a car, numerous storage spaces, a refrigerator in the dash panel, a door on the driver's side and even a bunk (available as an option), the driver of Domino is assured of excellent working conditions.

## Performance and profitability in the field

With its Euro 4 or Euro 5 engine combining performance and operating economy, Domino also offers a choice of powertrains depending on the expected usage. This vehicle is also characterised by the ease of access to the major components, and its simplified maintenance operations.

*Domino.  
The art of travel...*

1 - Seductive styling.

2 - Domino: A winning nature.

3 - An expressive front face.

4 - Domino: The street beckons.
